HEALTH QUESTIONNAIRE ACKNOWLEDGEMENT AND CONSENT TO PROCEED:

I certify that the answers to the health questions are accurate and correct to the best of my knowledge. Since a change of medical condition or medications can affect dental treatment, I understand the importance of and agree to notify the dentist of any changes at any subsequent appointment.

I authorize Dr. Meyer and/or such associates assistants as he may designate to perform those procedures as may be deemed necessary or advisable to maintain my dental health or the dental health of any minor and/or other individual for which I have responsibility, including arrangement and/or administration of any sedative (including nitrous oxide), analgesic therapeutic, and/or other pharmaceutical agent(s), including those related to restorative, palliative, therapeutic or surgical treatments.

I understand that the administration of local anesthetic may cause an untoward reaction or side effects, which may include, but are not limited to bruising, hematoma, cardiac stimulation, temporary or rarely, permanent numbness, and muscle soreness. I understand that occasionally needles break and may require surgical retrieval.

I understand that as part of dental treatment, including preventative procedures such as cleanings and basic dentistry, including fillings of all types, teeth may remain sensitive or even possibly quite painful both during and after completion of treatment. Gums and surrounding tissues may also be sensitive or painful during and/or after treatment. After lengthy appointments jaw muscles may also be sore or tender. Gums and surrounding tissues may also be sensitive or painful during and/or after treatment. Although rare, it is also possible for the tongue, cheek or other oral tissue to be inadvertently abraded or lacerated (cut) during routine dental procedures. In some cases, sutures or additional treatment may be required.

I understand as part of dental treatment items including, but not limited to crowns, small dental instruments, drill components, etc. may be aspirated (inhaled in the respiratory system) or swallowed. This unusual situation may require a series of x-rays to be taken by a physician or hospital and may in rare cases, require bronchoscopy or other procedures to ensure safe removal.

I do voluntarily assume any and all possible risks, including the risk of substantial and serious harm,if any, which may be associated with general preventative and operative treatment procedures in hopes of obtaining the potential desired results, which may or may not be achieved, for my benefit or the benefit of my minor child or ward. I acknowledge that the nature and purpose of the foregoing procedures have been explained to me if necessary and I have been given the opportunity to ask questions.
